🎓 Education

- **Jahrom University, Jahrom, Iran - Bachelor**
  September 2009 – June 2015
  Started studying software engineering in Jahrom university for almost 6 years. The 6 years length of studying has been because I wanted to also learn this field not just theoretically but also practically, so I was working as a freelancer with different companies in Shiraz, Iran. but I don't think software engineers would ever get graduated.

  Fluent

⭐ Projects

- **Keyvent.com – Event platform**
  NavaTec GmbH
  Full stack web developer: Front-End and Back-End

- **Darkness Within – 2D Game, An endless runner platformer**
  Personal mini project
  Darkness within is a small game which I developed by myself with Unity 2D and published it on google play. I'm not a game developer but I love to get more knowledge in this area.

❗ About me

- ### Ethics

  I am: Energized, A morning person, Disciplined, Organized and I can accept changes easily if they make sense.
  I always love to extend my knowledge and get more experienced.

- ### Work space

  I love to work in a place that can accept the energy and the discipline that I bring with myself. I like to be able to communicate with my teammates easily and friendly to keep the teamwork sprit always high. In a nutshell I love communicating with my colleagues and as a result see the job goes forward beautifully and fluently.

- ### Interests

  Game development: I love games I just love them, so because of that in my free time I always look into game development and always try to come up with something that is fun to work on as a personal project.

  Robotics: Just like how I feel with game development. I love to see a motor attached to a microcontroller is moving by the code that I've installed on the microcontroller. If I get enough free time after working on a game, I definitely start to build something.

- ### Hobbies

  Reading: I love reading novels and self-improvement books. The last novel I read was *The Idiot* by *Fyodor Dostoevsky* and the last self-improvement book I read was *The subtle art of not giving a f*ck* by *Mark Manson*.

  Biking: I love biking in early mornings when the city is so peaceful.

  Video Games: I love developing games why not playing them too.
